

There is a common attitude that entertainers around the world are overpaid . In fact , ~~this-it~~ is true that the amount of money they earn in a short time does not suit the amount of work they do . Also , entertainment is not a top priority in society.

However , what people do not consider is that when it comes to high salaries , we are talking about those stars like Taylor Swift , Beyonce and Lebron James who should not be considered ~~as a~~ representatives of the whole system . these people are rare talents and 99 percent~~s~~ of those who are working in ~~the~~ entertainment industry ~~can-not-cannot~~ reach the point which these stars are already standing at .

Moreover , staying at a top-notch position requires a massive amount of hard work/~~diligence/endeavor~~ in addition to tolerating a huge scale of pressure . People are not able to do that for a very long time or even if they do , sponsoring companies would finally replace them with new blood .

On the other ~~side-hand~~ , unfortunately , there are people making a big contribution to ~~the~~-society like teachers and science researchers/~~scholars~~ who are relatively underpaid . These people lead the progression/~~progress~~ of the countries and make the future generations ready to give their country services .

In summary , It is true that entertainers are relatively overpaid because the work which they are doing is not as important as the work of teachers and science researches ~~since-Since~~ , as a matter of fact , the future of nations ~~are-is~~ in teachers' and science researchers' hands .
