

*Some people think that newly built houses should follow the style of the old houses in the local areas, while others think that people should have freedom to build houses of their own styles.*

*Discuss both views and give your own opinion.*

The majority parts of cities' culture are represented by buildings' textures, due to this reason, the relative importance ~~to of~~ buildings ~~in is~~ a frequent topic of discussion. While there ~~is are~~ arguments against constructing new buildings the same as the old-ones, a lot of people and I believe that structures should be built to ~~response respond to~~ their present needs.

First of all, an ~~advantage-advantagous~~ feature of keeping the house styles in the same shape with ~~their~~ old counterparts is tourist attraction; which means it makes a spectacular view and reflects people's cultures. Therefore, increasing the rate of tourists ~~causes-leads~~ to ~~enhance-enhancing~~ the revenue of given regions. Although, this part of preserving culture is respectable, some materials which are used for building these structures are hazardous. To be more precise, utilizing these products for construction ~~of~~ buildings has negative effects on ~~the~~ environment. These days, the main method of architecture leads to ~~use-using~~ environmental friendly materials.

Additionally, human demand has changed since the world globalization. In put it simply, the main contributing factors of houses is completely different from ~~the~~ past. During the contemporary time, some facilities are needed in houses; hence buildings should be designed to answer all aspects of individual needs related to accommodations.

In conclusion, following the same pattern for constructing buildings involves some expense. Not only ~~does~~ maintenance of this kind of building costs a lot of money but also the percentage of waste of energy in these kinds of buildings ~~are-is~~ more than ~~its~~ modern counterpart. In order to, architects should use modern technology for design~~ing~~ new houses, such as using sustainable energy.
