

Do you agree or disagree with the following statement? The best way to travel is in a group led by a tour guide. Use specific reasons and examples to support your answer .

Traveling is ~~explore~~exploring the world to discover new or undiscovered places. It has plenty of way to travel . Traveling ~~by~~ with a tour guide is not only the best way but also is the safest way and it depends on people's personality . Some people think travel ~~by~~on a tour is boring ,so they prefer to travel alone. It is obvious that has got advantages and disadvantages which I indicate in this essay with some examples .

The main benefit is local knowledge . Tour guides have an ~~abundant~~abundance of local information about the place you want to travel to . They know all roads , historical places and the language , so you can have more accurate information about places. You can easily imagine how overwhelming and difficult it can be to travel without a tour. You do not recognize the ways and language , so how can you ~~can~~ identify significant places? ./landmark/tourist sites

The second issue is safety. The tour guide will help to keep you safe when undertaking ~~adventure~~adventurous activities such as safari, mountain climbing, scuba diving and whitewater rafting and they are familiar with the local weather conditions and aware of danger zones and when you get in trouble they can easily help you. For instance, when I was 12 , I had a trip to Turkey and we went to ~~withewater~~whitewater rafting and our boat overturned and I fell into the river and our tour guide saved me. Besides, tour guides will do all ~~planning~~planning for our trip including making reservations for example booking hotels or travel ~~arrangments~~ arrangments which is conducive to saving our time that it is a notable aspect of travel.

However, touring has disadvantages such as lack of flexibility and high cost. Organized tours often have a limited time, so you cannot see places conveniently because you have numerous ~~places~~ places with limited time which you should visit all of them quickly. In addition, travel ~~by~~with a tour guide has a high cost and because of that some people prefer to travel alone and use some guide books or navigations for finding ~~the~~places.

Ultimately, with all these descriptions I prefer to travel ~~by~~ accompanied by a tour guide because I go on ~~journies~~journies to

recover from tiredness not to get back tired and although it is not economical, it is the safest way for traveling.
