Some people believe that children should be allowed to stay at home and play until they are six or seven years old. Others believe that it is important for young children to go to school as soon as possible.
What do you think are the advantages of attending school from a young age?

Education systems differ from one country to another. In our country **the** schooling system divides into three periods, including primary school (6 years), secondary school (3 years), and high school (3 years) which is renewed in recent years. In some countries, like our country, attending school classes is compulsory from the age of six irrespective of what the consequences are.

Some people believe that children should be permitted to stay at home and do some entertaining activities such as playing video games, or some outdoor activities such as riding a bike or swimming until they are six or seven. This has some benefits if parents raise their offsprings well and give them a good education.

However, others believe that it is ~~significant~~ important/essential for young children to go to school as soon as possible. There are some advantages ~~of~~ to attending school from **a** young age. First and foremost, children learn social skills. They **are** require**d** to obtain such skills to interact with ease ~~to~~ **with** their peers. Communication with others enhance**s** children's development in acquiring skills which are relevant to ~~the~~ society at an early age.

Another advantage is that through attending schools, a child would be able to do his tasks independently. Providing opportunities for developing independence is beneficial for almost all pupils. They can take this advantage for having a better future not only in their school period but also in their academic life and generally, in their whole life. Going to school and staying in classes~~,~~ can give students a chance to choose a good role-model and obtain some behavioral aspects. For instance, when children observe that ~~some one~~someone is cleaning the class which ~~his~~ **their** teacher told **them to** , then the sense of accepting responsibility will be ~~increase~~ strengthened in ~~him~~them.

Overall, I believe the advantages of attending school from a young age ~~is~~ outweigh ~~of~~its disadvantages. The parents should encourage their chid to go to school to learn and acquire different skills, ~~regardless~~ in addition to~~of~~ reading, writing, and arithmetic.
