

Do you agree or disagree with the following statement? It is better for children to choose jobs that are similar to their parents' job than to choose jobs that are very different from their parents' job. Use specific reasons and examples to support your answer.

No one can ever deny the significant role of parents in children's future jobs but it does not mean ~~parents~~ they can force their children/offspring to continue their family path. Kids need to choose whatever they want for their future careers because they will be much happier and they can gain various experiences. Both conditions can have a positive and negative impacts which I explain ~~for you~~ with a couple of examples in this essay.

I begin with "similar to parents' job", in this case parents can teach diverse aspects in their jobs to their children frequently and they can share their experiences with them, so children can use ~~of this~~ situations perfectly and improve and boost their family jobs, even they can inspire ~~of their~~ parents to produce new and functional products. For instance, my family have owned a greenhouse for generations. My brother by his new knowledge and my father's experience produced a new fruit which is a combine combination/graft of peaches and apples. ~~Produce~~ a new harvest is a positive effect for my family especially for my brother but on other hand/side, if my brother does not enjoy ~~of this~~ job, he will be discouraged from what he did and this might be a negative effect.

On the other hand, if children go for their favorite jobs, it can have ~~variable~~ a different impact on their life. They do their desirable labor, so they can have extraordinary feeling. Besides, Due to the fact that they have no experiences ~~on~~ in their new jobs, ~~so~~ the probability of their failure will be increased but ~~from~~ in my view this defeat can be beneficial because they learn from their mistakes. Some people believe this failure is detrimental because they might feel absurd and as a result they look for another jobs which ~~this~~ can be disadvantageous. For example, when I started to work at a notary office, I had no experience and neither did my family. I was always doing my tasks wrong. At first I felt upset/sad/frustrated/blue but when I became a professional, I felt extremely satisfied.

Ultimately, from my point of view it is a remarkable that kids with awareness do their pleasant activity/functions and parents should support them with their accurate and timely/justly advice. In either

circumstance there can ~~it~~ be a ~~risk~~ probability of failure or success.
