

Some people think that art is an essential subject for children at school while others think it is a waste of time.

Discuss both sides and give your opinion.

A number of people believe ~~in which~~ art is an extremely important and necessary subject at school, though others believe it is misuse of time.

On one hand, those who think art is an essential ~~object-subject~~ try to nurture the child creatively. Art helps children to use their minds, hand and body in variety-various situations and also children learn how they can solve the problems. Art affects-on children from different aspects, ~~the~~ mentally and physically-effect. Children ~~followed~~ follow unknowns thing for themselves, so they are so curious and they should see and search until they find the right answer, because they have no experience from the world around them.

On the other hand, most of the parents want their children to have an important position in the future. The latter believe, the child is already to learn anything and has precious time, so a child should focus on the lesson that causes-of growth. This kind of parents usually make-take it hard-though to-on children and don't allow them themselves to experience it. They are concerned about their future.

As a result art is essential for children because it is an opportunity for children to learn and grow up. Art activity is a communication device between thinking/thought and statement-expression. This ~~object~~ helps ~~them-caused~~ express thoughts, emotional-emotions and experiences, so I agree with this item-opinion that art is ~~the-an~~ important and necessary lesson in schools.
