- These days parents have/exert ~~very~~ so much Perssure on their children to succeed ~~that~~ which causes them a lot of trouble/many negatives and positives ~~on them~~ which I do not agree with ~~them~~.

In my view, there are some reasons ~~that~~ why parents Force children to be successful for instance ,they are concerned about the future of their children and think if they don't succeed they will not live easily and make money as much as they want and enjoy their life.

- I think it has some positive and negative points for children for example, children ~~get~~ who succeed may feel more satisfied in comparison with others in the future but they miss~~ed~~ a lot of happiness and enjoyment which they should experience when they are young~~child~~ which makes them effective persons in the future but~~and cann~~ cannot learn how to enjoy their life. Besides, ~~,besides;~~it decreases children's creativeness which ~~it~~ also affects ~~on~~ their professional future to be successful.

To conclude, putting more pressure on children to progress ~~have~~ has more negative effect on them which does not let children ~~to~~ enjoy their life, as well ;moreover ,it may not make them successful people.
