

Do you agree or disagree with the following statement? In the past it was easier to identify what type of career or job would lead to a secure, successful future. Use specific reasons and examples to support your answer.

No one can ever deny the significant role of jobs in people's future life and most jobs cannot 100% guarantee which you become successful or not in future and humans cannot predict exactly what will happen in the future because the world is changing constantly. This question has been debated for many years and ~~have~~ has two main perspectives/sides which I will explain with some reasons and a couple of examples in this essay.

For the most and main reasons which can be on the top and covers other reasons is "education". Education plays an notable role for future jobs which nowadays people can access ~~it~~ easily because the number of schools and universities ~~were~~ was lower ~~less~~ in the past and most of the people did not have the opportunity to study because maybe they were ~~extremely~~ too poor to pay their education tuition fee which they had to work instead of studying or the schools were far from their home which they had to commute every day. For instance, if you watch old movies, you will see there ~~was~~ were no doctors in the villages because most of the villagers ~~rural~~ ~~was~~ were needy and also it was tough for them to ~~have~~ achievement ~~to~~ education.

Secondly, the number of careers ~~are~~ is increasing because the world is altering and people have various needs, so everyone can find a job that suits their interests. For example, in the past people did not care a lot ~~to~~ about their healthy, so they ~~did not have~~ had not nutritionists. On the other hand, with the advent of technology and the internet, many jobs were lost and devices and robots replaced people. For instance, the number of workers in factories was higher in previous years.

Last but not least, most of the people assume that success is related to ~~have~~ having high salary because people have not just basic needs they have diverse needs which they want to meet all ~~of them~~ and this causes competition with each other which some times ~~have~~ has damaging effect. For example, during the presidential election candidates ~~get~~ give false promises for more votes and ~~overcome~~ outperform ~~to~~ other ~~nominators~~ nominees but when they ~~were~~ are elected ~~selected~~ they do not ~~do~~ keep their pledges and it ~~cause~~ hurts social beliefs .

On the basis of the reasons that were mentioned above, both opinions can have advantages and disadvantages because it depends on

people's personality and their circumstance. Although nowadays it has become easier for people to reach education and they can choose a job which is in line ~~appropriate~~ with their interest, we should not ~~be~~ overlooked the presence of technology and unsafe competitions.
