

phenomenon of the world's culture shrinking and expanding at the same time

The ease of international travel and the spread of various kind of mass media all over the world have made it more possible than ever for people to know how other people live in other countries.

Do the advantage of this development outweigh the disadvantage?

~~Increasing the Increase~~ in international trips and the incredible effects ~~of~~ the communication media throughout the world have led to the public ~~become-becoming~~ familiar together especially in their life styles. Societies have relations and information interchanges with themselves that have widely ~~ly~~ merits and demerits. To my mind, though this development has some drawbacks ~~s~~ such as fading ~~of~~ some of the traditional cultures, it will greatly benefit both individuals and society especially in exchanging of ideas and helping each other.

Nowadays, people have ~~many-a lot of~~ information from other countries' life such as foods and those recipes, traditional clothes, hobbies and ceremonies which are very interesting for them. Because of this they have imitated other social customs and attitudes, which ~~they~~ find useful ~~or-enthusiastic~~ for themselves. Some long-term traditions ~~sa~~ may be forgotten in the face of more new methods from other cultures that were ~~populated-popular~~. For example, fading and going to be ~~en~~ forgotten, one of the Iranian traditional foods ~~s~~ –Kaleh josh- ~~and~~ was replaced with fast foods.

In spite of the above mention ~~ed~~, some individuals ~~s~~ or start- up companies are able to learn how to do new methods that are implemented outside their countries in their own jobs. For example ~~Tapsi Tap30~~ as a taxi service that ~~are-is~~ working by mobile applications are an Iranian version of international transportation Network Company ~~which-whose~~ name is Uber. This kind of following ~~are-is~~ very useful not only for the ~~personal-real and legal entities-people-or-company~~, but also for societies and economies.

Moreover, because of this relation, societies can help others ~~in-solving-solve~~ the problems ~~which-are-faced-facing~~ with them especially in ~~alleviate-alleviating~~ poverty and ~~raise-raising~~ living standards. For instance the campaign to help the girls who ~~have-are~~ not allowed to study in Pakistan or women ~~stereotype-stereotyping~~ in Afghanistan that are so effective for them.

To sum up, apart from some minor bad points that are inevitable as result of information interchange, ~~it-~~ ~~this~~ is a useful trends for societies.
