## Do you agree or disagree? People would meet many problems in their daily life and they would solve them by themselves or from the help of their families; the help from the government is not necessary.

From my viewpoint these kinds of questions can have variable answers becuase it depneds on people's personality and their situations and it is obvious that people encounter diverse problems in various levels during their life. Although people can cope with their problems, some reasons persuade me to put forward that <u>aiding aids</u> from others will be practical for them which I will explain with a couple of examples.

At the outset, some problems are bigger than which they can be solved by individuals, so there is a storng organization to handle that those issues like the government. For instance, financial problems or lack of jobs for those who is graduated recently and is are not the wealthy segment of society which means nowadays the economy economic condition is tough for most of the people and this is one of the most remarkable points which is growing and government should tend to it because it is out of people's control.

Another striking point is that sometimes if every individual or family wants to struggle with their own problems, the society becomes chaotic and irregular. For example, if everyone wants to find the thief of their personal belongings, the country will fall-run into trouble.

Last but not least, it is a given fact that each person gains specific experience during life, so by consulting/-consult with others we can use their experiences to become familiar with several solutions whereby we can solve our problems. For instance, if you want to invest in some spheres/areas/fields, it will be beneficial when you getting get advice from an eminent businessman.

To recap, the benefits of <u>receiving helping</u> from others to <u>solving solve</u> our issues greatly outweight the disadvantages <u>becuase because</u> we can learn from others' experiences, <u>preserving preserve</u> society <u>againstof chaotic chaos</u> and also sometimes <u>help people who</u> are <u>inability unable</u> to solve <u>certain/</u>some problems.
