

**Some people think that the teenage years are the happiest times of most of people's lives, while others believe that adult life brings more happiness, in spite of greater responsibilities.**

**Discuss both these views and give your own opinion.**

People have different experiences ~~during while~~ they are growing up, because of their different ~~carrierscareers~~, achievements as well as hobbies, some of them are enjoyable and others ~~are~~ have negative effects in their lives. Some groups believe adolescent~~s~~ have the most cheerful time in life and others think, although in the adulthood men and women are engaged with important duties, they are more satisfied with their life in comparison with ~~the~~ youth.

On the one hand, most of the juveniles are engaged with their formal education, friends and hobbies which are amazing for them. For example, going ~~to-on~~ trips and ~~to the~~ gym, attending ~~in~~ parties, falling in love and start~~ing~~ new relation with their partners, are some of the main activates which engross the youth. Moreover, though they are ~~depended-dependent~~ on their family because of their ~~finance-financial~~ requirements as well as their home ~~in~~ which ~~they are~~ living ~~in-that~~ with families and are controlled by their parents, they do not concern themselves with their ~~finance-financial~~ problems and responsibilities for other members of families. Furthermore, being mature, ~~the~~ youth have perceived new situations which can be amazing for them such travel to ~~the~~ countryside~~'s~~ with their peers or attending ~~in~~ sports competitions.

On the other hand, people who pass their teenage years, though are ~~response-responsible~~ for their families and have to work to get~~ting~~ enough revenue, owing to their sufficient income they can plan for themselves and are not ~~depended-dependent~~ on others. Moreover, ~~adults~~ can achieve their goals and enjoy ~~from~~ their life. For instance, if they have ~~a~~ good job and enough wage, they can endeavor to buy their dream car and home or reach a high position in their career without any ~~deterrent-disagreement~~ from their parents. That is why some groups believe full-grown people feel happiness more than young people.

All summed up, to my mind, each periods of ~~human's-humans'~~ life ~~has~~ ~~have~~ ~~it~~ ~~their~~ specific pleasure, sadness as well as events which are different among the people. That is why some groups happy ~~are~~ with their teenage life and the rest like their adult life.
