

A large number of deaths are caused by road accidents. Why do so many road accidents occur? Make recommendations that would help to reduce the number of road accidents.

The high rate of accidents on roads leads to a big number of demise/carnage and also it is increasing day by day. This phenomenon should be surveyed meticulously and methods need to be found in order to resolve this issue in a serious way. In this essay some indicators such as road's facilities and disobeying rules will be discussed, followed by recommendations to address the issues at hand.

Admittedly, the poor quality of roads ~~have~~ has a significant impact on the ~~amount~~ number of accidents in the roads. Although cities have been improving roads for many years, people are complaining about that ~~due to~~ since most accidents have occurred on narrow and winding roads. As a result, low quality of roads increases s driver's errors and causes s a large number ~~amount~~ of accidents.

Another reason is disobeying the rules. From my point of view, there is no doubt that drunk driving and excessive speed by drivers would lead to losing control of their vehicles. In this regard, not only have they put themselves at risk of fatal mishap, but also have created ~~made~~ a grave threat for others' life.

The former problem can be effectively resolved by planning to improve roads and providing clear road signs to prevent accidents. The latter problem would be solved by governments. To be more specific, they are able to be stricter on driving tests and they could introduce heavy fines/penalties ~~determine~~ ~~severe penalization~~ for those drivers who are more careless.

To put it in a nutshell, it is undeniable that drivers need equipped ~~facilitated~~ roads but the better way is thinking about the other side of the issue. It is not just about a ~~each~~-driver's life; it is also about other people's lives. ; they should respect it and obeying the rules.
