

105. Students at universities often have a choice of places to live. They may choose to live in university dormitories, or they may choose to live in apartments in the community. Compare the advantages of living in university housing with the advantages of living in an apartment in community. Where would you prefer to live? Give reasons for your preference.

University is an important part of our education. We obtain special skills and knowledge to succeed in the future. The first thing we need to decide before starting university is to decide the place where to live in. There are two choices; ~~one~~ one is dormitories on campus and two is apartments in the community. I think both of these options have advantages. I prefer to live in a university dormitory. ~~I will give my reasons to support my answer.~~ ~~Firstly,~~ the dormitory is cheaper, more secure and than the apartment. ~~Secondly, living in the dormitory is more secure than living in an apartment.~~ ~~Finally, living in dormitory~~ provides the chance ~~some chances~~ to find new friends.

First of all, the dormitory has many useful facilities such as libraries, Internet access, etc. In addition to these practical benefits, living in a dormitory is often cheaper. On the other hand, students would have to spend their money ~~for~~ buying furniture and kitchen appliances when they want to live in an apartment, so ~~So~~, living in the dormitory helps students save their money that ~~what~~ is important at the beginning of their independent life.

Secondly, living in a dormitory is more secure because there is a security system on ~~in~~ campus., all dormitories have some rules that every student has to follow them, such as time limitation. And all entrances s and exits s are checked by security. This is in contrast with living in a community apartment that allows students to have their own privacy and freedom. They can come back their home anytime they want, but they don't have any guard, so ~~So~~, living in the dormitory is ~~in~~ convenient and safe.

Finally, the student has many chances to interact with so many different other students who belong to different countries and cultures. This helps in developing students' interaction skills s. The dormitories often provide the best environment for students to enjoy the campus live. Students can easily find friends to study with. They can easily find ~~easily~~ any information of events that happens on ~~in the~~ campus, but ~~But~~ when the student lives s in an apartment he /she might be alone and feel lonely.

To sum it up, considering ~~for~~ all the benefits that living in university dormitories would be able to bring to students, by being more convenient, by having more opportunities to

make friends and by allowing students to be more focused in their studies, I believe that living in university dormitories is the best option for students.
