Do you agree or disagree with the following statement?

People benefit more from traveling in their own country than from traveling to foreign countries.

Numerous/ ~~Plenty of~~ people spend their leisure times ~~in~~ traveling to exotic places. People appropriate a huge budget to their journeys. A question which is the matter of concern is whether internal journeys ~~are~~ have more profitable than external journeys? I am, to a great extent of the opinion that internal trips have more advantage~~sous~~ over external trips.

To begin with, traveling in our own country helps ~~to~~ the country's economy. Broadly speaking when you go from your state to another ~~state~~ you will spend your money in your country ~~and this~~ which will help ~~to~~ the economy of that states. In internal traveling you consume inner/~~domestic products~~ productions and services and go to inner hotels and pay their rents. To be more specific ~~on~~ in each business or vacation trip ~~workable journey or fun journey~~ you appropriate money for the hotel and many other ~~expenses~~ things that you need; these help money to circulate/turn in an economic cycle ~~and it lead~~ leading to a thriving tourist industry. When this section succeeds, ~~success~~ it could help ~~to~~ other industries to overcome their problems. As an illustration, ~~an~~ the economic magazine mentioned (?) that the tourist industry has 0.2 percent of the economic rising rate in the developed countries and if a country can encourage ~~its~~ ~~his~~ (?) people to internal traveling it could raise ~~rise~~ this factor.

External trips are expensive and ~~on~~ in these trips you have stress. Of equal importance is the fact that some problems such as security are very important in a foreign country. Strangers have been easily attacked by culprits. Simply stated, in a new place that you do not know ~~it~~ you will be vulnerable. Health problems are very dangerous for you because you do not have ~~not~~ any friend to help you and you have a limited budget. However, what I stated cannot be over-generalized to all contexts~~72~~ in a new country you can learn a new language, see different cultures and a lot of new places.

To put it in a nutshell, it is better to travel in our country because not only does it help our economy, but also an external journey has many problems and it is usually expensive.
