

In some countries an increasing number of people are suffering from health problems as a result of eating too much fast food. It is therefore necessary for governments to impose a higher tax on this kind of food. To what extent do you agree or disagree with this opinion?

As a consequence of urbanization most of the people are too busy with their daily tasks. Thus, because of lack of time they prefer to consume fast food rather than traditional and healthy ~~ones food~~. There is a view/an idea that the government can impose higher taxes es to prevent ~~from~~ consumption of junk food. However, this is not ~~and~~ an efficient method.

I believe that there are several ways to control the consumption of fast food. The Government can provide some facilities to urge people to take for taking a healthy meals. By this, I mean the government can arrange a free monthly ceremony in outdoor places and serve traditional food and clarify the benefits of healthy food through by some especial speeches. Also, it this is a great idea to exploit endorsement in media for instance, in commercial programs and between the gap of some specific movies. In addition, using the eye-catching methods s attracts s the ordinary people to take more fruits and traditional food by setting up/erecting some billboards s around the cities. Moreover, children should be educated from an early age by their parents and after that in the schools s about the advantages of healthy food and disadvantages of junk food. Besides, it would be

Useful/great if each company and organization provided d the fresh fruits for their employees.

Likewise, government and private sector should cooperate with each other for holding an exhibition at least annually and advertising the benefits of vegetables and healthy food and explain the drawbacks of fast food. It is good to mention that participation in awareness campaigns s would change the view and bad habits of consumption too much fast food. Furthermore, a large number of people are working in sausage manufacturing companies (sausage's manufacturing company) as ~~an~~ experts, workers employee and as a labor and even there are a huge number of people who are working in restaurants. If the government imposes s a higher tax, some manufacturing companies company (will be faced with) will face ~~to~~ bankruptcy, unemployment ~~people~~ and corruption. Unfortunately, many people cannot afford the high cost of healthy food, so the poverty will expand to all around the country.

As far as I am concerned, increasing the tax of fast food does not have an efficient impact on preventing to prevent decreasing the consumption of junk food. The government should motivate people by advertising, teaching and propaganda to consume more healthy food.
