

## Television

In today's modern world, television is one of the most important devices. As with ~~everything every thing~~ there are advantages and ~~dis~~ disadvantages with the television.

The first advantage is, television's ability ~~in letting us know to know the~~ news as it happens. ~~The~~ second (~~secend~~) one is it has information available for viewing. the third ~~of~~ advantages, ~~is that~~ it can help to see all ~~of~~ countries and places ~~of interest~~ (~~intersted~~).

~~However,~~ But one of the disadvantages is the amount of time ~~of~~ watching television ~~which causes obesity and they will be fat~~. the second one ~~of~~ disadvantage is ~~that the~~ children and teenagers watch programs that ~~are~~ unsuitable for them.

But my idea is, that television is a good device and we can use it ~~on at~~ suitable times with planning, and we can check (~~chek~~) and control TV channels (~~chanel~~) when ~~the~~ children ~~are~~ watching TV until they (~~thay~~) can understand what ~~does- it is~~ good and what ~~is does it~~ bad.
