

Young people should be encouraged to pursue long-term, realistic goals rather than seek immediate fame and recognition. Write a response in which you discuss the extent to which you agree or disagree with the statement and explain your reasoning for the position you take. In developing and supporting your position, you should consider ways in which the statement might or might not hold true and explain how these considerations shape your position.

---

Nowadays immediate fame and recognition have become an aim for immature youth; while, they should put their effort in long-term and rational goals. This issue is burgeoning through out-out young citizens comparing themselves to celebrities gaining their fame over a night. As far as I am concerned, I believe that parents should encourage and advise their neophyte children to set a more logical benchmark for their future. To put it simply, I refute aiming for an imminent achievement which almost is whimsical imiscal in a lot of lots of cases.

Firstly, following long-term goals improves individuals' personality. In other words, not only does it contribute positive characters to fledgling youth, but it also encourages them to become hardworking individuals guy in their life. For instance, patience can be achieved implied by setting these kinds of goals. moreover, they learn to be persistent ee and do not get frustrated after facingeing a sophisticated and enervating impediments. In addition, they try in a constant rate of endeavouring and not struggle ingeing too hard. Consequently, they are vulnerable to be dissuaded d from following their goals due to pushing themselves harder than they can brook.

Secondly, the achievements reached by scheduling long-term effort last more than those gained over a night. For example compare a soccer player and an ordinary accountant. At first glance, it is crystal clear that a football player earn lots of money than a simple employee; whereas, his job security is more endangered because of unpredicted injuries or coach policies ploicies which are is volatile during every season. So it is more cerebral to rely on an average salary than on a an capricious income that would not last after a certain age.

The last but not the least, immediate fame and recognition recognition might not seem as it is. Being in the public eye has its own disadvantages too. You cannot can not experience it unless you become one, which is too late. I am trying to say that some celebrities prefer to be ordinary denizens instead of luminaries because they are tired tierd of being under of such overwhelming attention. Not every one one is prepared for to this situation; as a result, we observe irritating and abnormal retorts and actions committed by them under intense and severe circumstances. Hence, it is more joyful to live freely without being monitored ing by paparazzi ies and such fanatical critics.

All in all, extended achievements s s are far better than illusionary ones which could be disappeared d like the way they were reached. To me, taking the safe route like every body body else is preferable than taking the risk of unpredicted goals that could jeopardize radize all of your effort along with your enthusiasm.
