

94.07.17 workshop FRI session 25 Poverty

Poverty-stricken nations

War and debts to wealthy nations make it inevitable

That many people will struggle to survive

Sedentary lifestyle

The causes of poverty in the USA range from poor education to downsizing

In major corporations

People at the lower end of the economic scale

Countries should concentrate on improving their citizens' lives

Instead of spending heavily on arms

Raise living standards

Canceling third world debt

In this way, they can reduce poverty

Governments should consider how wealth is divided

They should have a responsibility to protect all citizens

Good luck!
