

Under no circumstances should you experiment with drugs

Patients stroking a furry pet

are more likely to survive

after a heart attack or brain stroke

children raised/brought/nurtured by abusive parents

are more prone to juvenile delinquency

children ignored by their parents are more vulnerable

the woman wearing a chador is your granny

drivers zigzagging on the road should be heavily fined

architects scoring 6 receive their visa promptly

students disrupting class should be separated

people committing crime

continue their heinous acts with impunity

Good luck
